SUMMARY

Versatile and results-driven Web Developer Associate with hands-on experience in **HTML, CSS, JavaScript**, and modern frameworks. Specializes in **WordPress development** using Elementor, Divi, and custom themes, along with strong proficiency in **React.js** and **Python (Django)**. Experienced in crafting responsive, SEO-optimized web solutions and implementing effective **on-page SEO strategies** to boost visibility and performance. Skilled in using tools like **Supabase, Firebase**, and **Microsoft Office** for streamlined development and project documentation. Currently exploring advanced technologies including **blockchain** and **hyperlocal marketing systems**. Dedicated to building scalable, user-focused digital experiences that align with business goals and industry standards.

EXPERIENCE

Web Developer Intern

Nov 2023 – Apr 2024, Pune

Radon-Media

- Successfully managed diverse WordPress websites, overseeing their development, maintenance, and optimization.
- Implemented effective on-page SEO practices to enhance visibility and performance across digital platforms.

Web Developer Associate

May 2024 – Present, Pune

Radon-Media

- Built and customized high-performance WordPress websites and Shopify stores using Elementor, WP Bakery, Divi, and custom themes, ensuring responsive, SEO-optimized, and conversion-friendly interfaces.
 - Executed effective on-page SEO strategies, improving search visibility and driving organic traffic through structured content and meta optimization.
 - Developed responsive UIs and interactive components using React.js for key projects such as:
 - Itinerary Planner (integrated with a WordPress site)
 - Live In Dapoli (tourism-focused platform)
 - HyperLocal OS (hyperlocal marketing tool – in development)
 - Enhanced web performance and user engagement with modern design principles, animations, and cross-device optimization.
 - Engineered and deployed responsive e-commerce platforms for two brands, reducing average page load time by 60% and improving mobile conversion rates by 25% through cross-device optimization.
-

PROJECTS

IFSC Code Finder

College Project • Feb 2023 - May 2023

- Developed a web application for easily finding the IFSC code of the banks branch wise.
- Leveraged technologies such as HTML, CSS, JavaScript, MySQL, PHP, and XAMPP (local server) to ensure seamless functionality and database management.

LensHub Eyewear Shop

Personal Project • Mar 2025 - Present

- Developing a full-stack eCommerce web application for a local eyewear business using **React.js**, **Clerk authentication**, and **Supabase**. Includes admin dashboard, appointment booking, COD-based order management, and user profile features..
